

ADAM WONDALE

Software Engineer

Recent Computer Science graduate building full-stack web and mobile applications. Works primarily with Next.js, React Native, and Node.js. Led backend development on a community crowdsourcing platform for final year project, plus built e-commerce apps and AI-powered exam prep tools. Focuses on practical, working software and adapts quickly to new stacks.

Professional Experience

May
–
Jul
2026

Data Encoder (Volunteer)

CAWEE, Addis Ababa

- Managed data entry, ensured data integrity, and maintained digital records.
- Streamlined data collection processes and improved accuracy with team.

Personal Projects

Community Issue Crowdsourcing Platform — Backend Engineer & PM
Platform for community members to report local issues. Final year university project.

- Led backend dev and managed project lifecycle from ideation to delivery.
- Implemented scalable RESTful APIs and optimized DB queries for concurrent reports.
- Collaborated with frontend team for seamless API integration.

Shoe Store E-Commerce Platform — Full Stack Developer
Digital catalog and ordering web app for a local shoe store.

- Built custom cart, product filtering, and secure admin dashboard.
- Integrated Supabase for real-time data syncing and auth.

AI-Powered Exit Exam Tool — Developer

Educational platform generating targeted exit exam prep questions via AI.

- Implemented filtering and mock data rendering with Drizzle ORM and PostgreSQL.
- AI-generated step-by-step explanations for incorrect answers.

Interactive Developer Portfolio — Frontend Developer

Modern, responsive portfolio using Next.js to showcase projects and skills.

- Implemented micro-animations and responsive layout without generic templates.
- Scored 100 on Lighthouse performance by optimizing images, fonts, and scripts.
